ACKNOWLEDGEMENTS

SPECIAL THANKS

The RTA Board of Commissioners gives special acknowledgement to its riders and to the Strategic Mobility Plan Advisory Committee that consisted of representatives from over 50 agencies, community groups, and other stakeholders throughout the region.

RTA BOARD OF COMMISSIONERS

Sharonda Williams, Chairwoman
Earline Roth, Vice-Chairwoman
Flozell Daniels, Jr., Commissioner (Orleans Parish)
Ashleigh Gardere, Commissioner (Orleans Parish)
Barbara Waiters, Commissioner (Orleans Parish)
Sharon Wegner, Commissioner (Jefferson Parish)
Al Herrera, Commissioner (Jefferson Parish)
Walter Tillery, Commissioner (Jefferson Parish)

4 THE PLAN ..............................26
INTRODUCTION
WHAT IS THE STRATEGIC MOBILITY PLAN?

- **A roadmap for improving public transportation** in the region over the next 20 years. Future decision-making and investments made by RTA will be driven by this Plan.
- **A new mission** that more clearly identifies the core purpose of RTA.
- **A new vision** for what RTA will be in the future based on what we heard from the community.
- **A set of goals** to achieve in order to meet the needs of the community and make the new vision a reality.
- **Identification of strategies and actions** necessary to accomplish the goals. This includes a phased action plan of major initiatives and projects, so everyone knows what RTA will focus on and when.
- **Measures of progress** to make sure RTA continues to improve and stays on track.

WHAT IS IT NOT?

- In-depth planning, design, or engineering for projects
- Determination of what vehicle type or schedule is best suited for any given corridor
- Detailed cost estimates or funding plan
INTRODUCTION

STRATEGIC FRAMEWORK

MISSION
Why we exist

VISION
What we want to be

GOALS
What we need to do to achieve vision

OBJECTIVES
Intended outcome of each goal

STRATEGIES
How we accomplish the goals and objectives

ACTIONS
How we implement strategies

MISSION
Provide safe and dependable mobility services.

VISION
Become the preferred mobility provider in the region.

GOALS

- EARN TRUST
- BE EQUITABLE
- PRIORITIZE THE RIDER EXPERIENCE
- BE RELIABLE
- CONNECT TO OPPORTUNITIES
- SUPPORT A SUSTAINABLE, HEALTHY REGION
INTRODUCTION

MOBILITY OPTIONS IN THE PLAN

In addition to improving existing bus, streetcar, ferry, and paratransit service, the Plan introduces mobility options that may be unfamiliar to people in Greater New Orleans. Some of these new options build upon existing services while others are entirely new services using emerging technologies.

**HIGH-CAPACITY TRANSIT ROUTES**

- **Available Modes** (BRT, Streetcar, and LRT)
- **Every 10 min. (peak)**
- **Every 15 min. (off-peak)**
- **20-24 hrs per day**
- **Stops every 1/4 to 1/2 mile**
- **Pay before boarding**
- **Extensive use of dedicated roadway space and/or coordinated traffic signals**

**SELECT SERVICE ROUTES**

- **Available Modes** (Existing Bus and Streetcar routes)
- **Every 15 min. (peak)**
- **Every 20 min. (off-peak)**
- **18-24 hrs per day**
- **Stops every 1/4 mile**
- **Pay before boarding**
- **Use of dedicated roadway space and/or coordinated traffic signals**

**PLUS...**

- **Regional Express Connections**
  - Commuter bus
  - 30 min (peak only)
  - Limited stops

- **Water Transportation**
  - Modern and traditional ferries
  - Every 15-30 min., 7 days/week
  - Longer hours of operation
  - Existing plus new terminals

- **Downtown Mobility Improvements**
  - Service type TBD
  - Every 10-15 min., 24 hours/day
  - Looping around high demand travel areas

- **Pilot Programs**
  - Microtransit
  - On-Demand/flexible services
  - Autonomous vehicles
### IMPLEMENTATION TIMELINE

#### START A NEW FOUNDATION
- Redesign and simplify the entire transit system as needed
- Improve public information and customer service
- Provide real-time, vehicle tracking information to riders
- Start improving transit stops with more benches, shelters, art, and information
- Speed up travel times by reducing cash fares, excessive stopping, and conflicts with automobiles
- Encourage more affordable housing and community services along proposed High-Capacity Transit
- Introduce faster, modern ferries
- Begin incorporating low- or no-emission vehicles into the fleet
- Pilot emerging mobility options
- Begin measuring results of the Strategic Mobility Plan

#### BUILD THE SYSTEM
- Begin introducing High-Capacity Transit, Select Service, Regional Express Service, and expanded water transportation options
- Speed up travel times and improve on-time performance by adding dedicated transit lanes, signal priority improvements, and other transit priority treatments
- Construct transit centers in Downtown, New Orleans East, and Algiers
- With improved services, expand the scope of partnerships with schools, major employers, and social service providers
- Identify and secure additional funding sources
- Study options for making mobility in the region a seamless experience for the rider

#### PROVIDE A COMPLETE MOBILITY SYSTEM FOR ALL
- Implement all remaining High-Capacity Transit routes and expanded water transportation options
- Coordinate with the State to implement the proposed Baton Rouge-New Orleans Passenger Rail project
- Complete the process of making all transit stops accessible for people with disabilities
- Establish smaller mobility hubs at targeted locations
INTRODUCTION

THE PLANNING PROCESS

RTA worked with the public and stakeholders over the course of a year to develop the Plan. This process was broken into the five distinct phases below.

LISTENING AND LEARNING
Community conversations about needs, objectives and measures of success (January – March 2017)

EXPLORING OPPORTUNITIES
Assessment of strengths, weaknesses, and changing mobility demands; sharing information on emerging innovations and options (April 2017)

VISIONING
Update of RTA’s Mission, Vision, and Goals; identification of strategies to achieve these goals and ways to measure progress (May – July 2017)

EVALUATING OPTIONS
Evaluation of possible mobility strategies; assessment of trade-offs and opportunities (August – October 2017)

DEVELOPING THE PLAN
Draft of plan for a sustainable, equitable, and vibrant New Orleans region (November – December 2017)
INTRODUCTION

HOW WE ENGAGED

The planning process included more than 4,500 engagements with people who attended meetings and workshops, listened to presentations, participated in interviews, or submitted surveys or comments. The Plan is the result of this collaborative effort that included stakeholders of all types, including:

- Riders and Non-Riders
- Advocacy Groups
- Government and Public Agencies
- Other Mobility Providers
- RTA Operators and Administrative Staff
- Schools and Universities
- Major Employers and Economic Development Agencies
- Advocacy Groups
- School and Universities
- Other Mobility Providers

4,500+ ENGAGEMENTS

13 Public Meetings with
300+ attendees

34 Standing Community Meetings with
800+ attendees

31 Pop-Up Events with
1,200+ attendees

4 Advisory Committee Meetings
37 Stakeholder Interviews
2,200+ Surveys and Comments submitted

1 An engagement is a project meeting attendee, stakeholder interview, or submitted survey or comment card. Some individuals have engaged in the SMP more than once during the process.
This section highlights how RTA will accomplish the goals presented in the previous section. The action plan for each goal is summarized here, along with an overview of key findings and input from the planning process.
**OVERVIEW**

**EARN TRUST**

**BE TRANSPARENT IN DECISION-MAKING**

**IMMEDIATE ACTIONS (2018-2019)**
- Transition to evening Board meetings with public comments at beginning
- Provide monthly project updates
- Provide easily accessible public information and rider alerts
- Post online dashboard for up-to-date performance data
- Share easy-to-understand budget summaries
- Improve customer complaint and request responsiveness enable customer tracking
- Provide annual progress updates for the Plan

**SHORT-RANGE ACTIONS (2020-2022)**
- Update the Plan at the 5-year mark
WHAT WE FOUND

*Technology is changing expectations.* Through the internet, smartphone apps, and real time updates, information is now available 24/7. This new paradigm has changed how riders plan their trips and raised their expectations. When information is not immediately available, riders lose faith in their transit providers.

*Riders are a key part of the decision-making process.* When riders contribute to decisions, they truly own their transit systems. Several existing RTA practices, such as maintaining a Riders Advisory Committee, already help engage with riders. Other agencies have dedicated a Board position for a rider and have Board members attend public meetings to hear input directly from the community.

WHAT WE HEARD

- **Board meetings aren’t accessible**
  - Riders and Non-Riders
- **It’s hard to get up-to-date information**
  - Riders and Non-Riders
- **We don’t understand RTA’s budget**
  - Stakeholders and Non-Riders
- **RTA needs to track the progress of the plan**
  - Stakeholders
- **Update the Plan on a regular basis**
  - Stakeholders
OVERVIEW

BE EQUITABLE
PROVIDE MOBILITY SERVICES IN A JUST AND FAIR MANNER

IMMEDIATE ACTIONS (2018-2019)
- Improve coordination with affordable housing groups
- Encourage affordable housing in new developments with good transit

SHORT-RANGE ACTIONS (2020-2022)
- Plan for making all transit stops accessible for people with disabilities

LONG-RANGE ACTIONS (2028-2040)
- Ensure all transit stops are accessible for people with disabilities by 2031
OVERVIEW

WHAT WE FOUND

It's becoming more expensive to live in areas with good transit. The demand for walkable, urban living in New Orleans has increased housing costs in areas along frequent transit routes. This means that people who use transit the most, people with low incomes, are increasingly moving to suburban areas that are further from Downtown and have less frequent service. While increasing transit service in these areas is one solution, many regions have also begun to encourage more affordable housing in areas with good transit service.

Access for All. To provide transit services for everyone, all components of the trip must be accessible. New Orleans isn't there yet and has a big challenge to make transit accessible for all. Most transit stops are not currently accessible for people with disabilities because of sidewalks and crosswalks in poor condition. Improving this infrastructure and training drivers to know how to best assist riders with disabilities will be major improvements. New on-board announcement technology will also make riding transit easier for people with visual disabilities and people who are less familiar with the system.

Information shouldn't depend on technology. Mobile applications are a useful tool to plan trips, receive rider notifications, and track vehicles in real-time. However, many New Orleanians lack smartphones or have other barriers. For instance, nearly 40% of the region’s residents read below a 5th-grade level and nearly 25% of residents live in poverty. For these reasons, RTA will continue to provide information in many ways, so everyone can get the information they need.

WHAT WE HEARD

Good transit is a key for a more equitable region

Stakeholders

Don’t price people out of neighborhoods

Non-Riders and Stakeholders

Focus on low-income people, not tourists

Riders and Non-Riders

Stops are inaccessible to people with disabilities

Riders and Non-Riders
OVERVIEW

PRIORITIZE THE RIDER EXPERIENCE

PROVIDE MOBILITY SERVICES THAT ARE SAFE, EASY TO USE, AND COMFORTABLE

IMMEDIATE ACTIONS (2018-2019)
- Improve customer service training and surveying of customers
- Make payment with the mobile app easier and faster
- Begin improving access to stops and maintenance of stop areas
- Begin installing more benches, shelters, art, and rider information
- Improve safety practices

SHORT-RANGE ACTIONS (2020-2022)
- Provide new fare and pass options and study smart card options
- Simplify schedules and brand routes by frequency

MID-RANGE ACTIONS (2023-2027)
- Purchase buses with more amenities
- Build transit centers in Downtown, New Orleans East, and Algiers

LONG-RANGE ACTIONS (2028-2040)
- Establish small mobility hubs at targeted locations
- Implement smart card program
OVERVIEW

WHAT WE FOUND

If you don’t encourage ridership on Day 1, there is no Day 2. People who are unfamiliar with transit need a system that’s simple and easy to use. That includes information, easy payment options, and intuitive schedules. The Chicago Transit Authority found ridership increased on routes with their Bus Tracker system, and are expecting that increase to be compounded as more routes are upgraded. King County Metro (Seattle) riders ranked the system’s ORCA regional farecard as their favorite element of the service.

Multimodal hubs can make mobility easier. Multimodal hubs provide a place to integrate all transportation options, making it easy to make trips using multiple modes. In Fairfax, VA, hubs are served by transit routes, bike share and car share stations, park-and-ride lots, taxis, and transportation network companies. This expands the reach of the transit network to provide mobility across the region.

WHAT WE HEARD

Improve customer service training

Riders

Transit needs to be attractive and seamless

Non-Riders and Stakeholders

Make stops comfortable, clean, and safe

Riders and Non-Riders

Provide real-time info on apps and at stops

Riders and Non-Riders

The schedules are confusing

Non-Riders
BE RELIABLE
PROVIDE ON-TIME AND PREDICTABLE SERVICE

IMMEDIATE ACTIONS (2018-2019)
• Use new technology to improve dispatcher-driver communication
• Provide vehicle tracking and improve communication of service disruptions
• Increase GoMobile usage and deploy more Ticket Vending Machines
• Develop a Transit Asset Management plan
• Introduce faster, modern water transportation vehicles

SHORT-RANGE ACTIONS (2020-2022)
• Provide real-time arrival information at high-traffic stops
• Reduce conflicts with automobiles and study special transit lanes
• Increase fares and innovative funding solutions, like private partnerships
• Overhaul the bus fleet and adjust routes where schedules are too tight
• Pilot autonomous vehicle service
• Create a career pathways program for employees

MID-RANGE ACTIONS (2023-2027)
• Start building dedicated lanes, HOV lanes, and other priority treatments
• Seek additional dedicated funding sources
WHAT WE FOUND

Technology is influencing all areas of mobility. Real-time transit information can be displayed at stops and on smartphone apps. This makes transit more convenient and can also help riders plan trips with multiple transportation modes.

Many approaches to improving reliability. Most of the delays for RTA’s buses and streetcars come from operating in mixed traffic with cars. Transit priority treatments, like dedicated lanes and coordination with traffic signals, help transit routes operate more reliably. Furthermore, modern GPS equipment on vehicles, like those recently installed on RTA vehicles, enable drivers and dispatchers to quickly and effectively communicate problems and solutions when there are delays.

Mobile ticketing makes boarding faster. 87% of transit agencies either have or are planning to implement mobile ticketing to gain new ridership and reduce vehicle dwell time. People paying in cash slow down the boarding process at stops, especially at high-traffic stops.
CONNECT TO OPPORTUNITIES

PROVIDE GOOD ACCESS TO DESTINATIONS UTILIZING ALL TRANSPORTATION OPTIONS AVAILABLE

IMMEDIATE ACTIONS (2018-2019)
- Pilot CBD circulator options and on-demand/flexible services in areas TBD
- Begin quarterly coordination meetings with transportation-related agencies
- Create Transit-Oriented Development program

SHORT-RANGE ACTIONS (2020-2022)
- Comprehensively evaluate all routes and redesign system as needed
- Study creating High-Capacity Transit routes within Orleans Parish
- Pilot more circulators and on-demand/flexible services
- Work with the State to re-introduce Baton Rouge commuter bus service
- Partner with schools, hospitals, and major employers to encourage ridership
- Coordinate with any expansions of bike share and car share programs
- Develop cost and revenue sharing agreements for regional routes
New Orleans and the surrounding region are growing in ways that will increase the demand for public transportation. The City of New Orleans and Greater New Orleans have consistently added jobs in recent years. From 2011 to 2016, New Orleans added over 18,000 jobs - nearly half of the region’s overall growth. Much of that growth has happened in areas that are growing upward, such as the Central Business District, the Biomedical District, Veterans Boulevard, and Elmwood.

Many new jobs are Downtown, in hospitality with less traditional schedules. Hospitality workers ride transit to work more than any other industry in New Orleans. As this industry continues to grow and evolve, new challenges are arising for RTA. Due to the 24-hour nature of hospitality jobs and the somewhat unpredictable schedules from week to week, having mobility options at all times of the day is critical. However, many employees reside in areas where traditional, frequent transit service is difficult to support. Transit agencies across the country are looking at innovative options to address issues like these.

Key destinations draw lots of trips. Some land uses generate extremely high demand for transit service, particularly healthcare, education, and tourism-related land uses. These include hospitals, schools, universities, the airport, and special events/sports venues. Education and medical-related trips combined account for approximately 20% of all RTA trips.
CONNECT TO OPPORTUNITIES

PROVIDE GOOD ACCESS TO DESTINATIONS UTILIZING ALL TRANSPORTATION OPTIONS AVAILABLE

**MID-RANGE ACTIONS (2023-2027)**
- Implement initial High-Capacity Transit routes and Gretna water transportation
- Establish Select Service and Regional Express routes
- Study creating High-Capacity Transit routes that cross parish lines
- Re-evaluate how RTA can incorporate emerging transportation options
- Build park-and-ride lots and car share stations near transit
- Study options for integrating all transportation services in the region

**LONG-RANGE ACTIONS (2028-2040)**
- Support implementation of Baton Rouge-NOLA passenger rail project
- Implement remaining High-Capacity Transit and Bywater water transportation
WHAT WE FOUND

Transportation choices are changing. People just want to get where they are going safely, reliably, and affordably. People will use multiple modes to complete a trip and different modes on different days. This has given rise to the concept of a “mobility ecosystem” – including traditional options (e.g., mass transit, walking, and bicycling) and new shared mobility options, such as ridehailing, carshare, bikeshare, and microtransit.

Jobs are spread throughout the region. RTA’s service area only covers a portion of the region’s jobs, with other transit agencies providing service in surrounding areas. This can be inconvenient for riders and add additional travel time to their commutes. Regions across the country have handled this issue differently, with some consolidating multiple agencies into one agency and others collaborating extensively to provide regional routes.

WHAT WE HEARD

We need a truly regional transit system
Everyone

Schools and big employers want to partner
Stakeholders

More housing and jobs near good transit
Stakeholders and Non-Riders

Build park-and-ride lots in outlying areas
Non-Riders

Coordinate with bike and car share programs
Stakeholders and Non-Riders
SUPPORT A SUSTAINABLE, HEALTHY REGION

MITIGATE CLIMATE CHANGE AND IMPROVE PUBLIC HEALTH

IMMEDIATE ACTIONS (2018-2019)
- Begin incorporating low- or no-emission vehicles into fleet
- Reduce redundant stops
- Work with the City to waive parking requirements for new developments near frequent transit service

MID-RANGE ACTIONS (2023-2027)
- Generate more renewable energy on facilities
- Work with partners to make major corridors more pedestrian-friendly
- Work with the City to price parking according to demand in key areas

LONG-RANGE ACTIONS (2028-2040)
- Provide fast, frequent service to most major healthcare facilities and most major parks and recreational facilities
Transit has lots of options to improve the environment. The transportation sector generates half of New Orleans’ greenhouse gases. By carrying more people per vehicle, transit emits less per person than driving alone. New types of buses and administrative vehicles will emit even less.

Transit can do a lot more. Only 8% of the region’s commute trips are via transit. That leaves lots of opportunity to grow.
Implementing the Strategic Mobility Plan will bring huge benefits to the region, such as increased ridership and better access to jobs by transit. However, achieving these benefits will require large investments and new funding sources.
BENEFITS AND COSTS

**BENEFITS**

- **AVERAGE WEEKDAY RIDERSHIP**
  - Existing: 64k
  - With Plan: 96k

- **REGION’S JOBS WITHIN 60 MIN. BY TRANSIT**
  - Existing: 31%
  - With Plan: 60%

- **ECONOMIC IMPACT OF RTA**
  - No Build Future: $5B
  - Bus Rapid Transit: $11B
  - Streetcar: $18B
  - Light Rail: $25B

**COSTS**

- **Operating Budget (Annual)**
  - Existing: $100M
  - Bus Rapid Transit: $239M
  - Streetcar: $289M
  - Light Rail: $258M

- **Capital Costs**
  - No Build Future: $846M
  - Bus Rapid Transit: $3.2B
  - Streetcar: $8.3B

*The Strategic Mobility Plan does not include detailed cost estimates for specific projects or a funding plan. Studying and designing projects and securing new funding sources are key elements of the Plan.*
The Strategic Mobility Plan includes approximately 130 specific actions that RTA and other stakeholders will undertake over the next 5, 10, and 20 years. These actions are organized by strategy for each goal area.

In order to monitor progress, performance measures and targets are also included for each goal.
# The Plan

## Earn Trust

**Be Transparent in Decision-Making**

**Strategy:** Improve public information and rider communication

<td>2028-2040</td>
</tr>
</tbody>
</table>

**STRATEGY:**

- **Encourage more affordable housing and community services in areas along High Capacity Transit lines**

  - **BE1.** By 2018, begin working with local governments and partners to increase affordable housing units and community services in areas along High-Capacity Transit lines
  
  - **BE2.** By 2018, adopt guidelines with local governments to create land use regulations that encourage more affordable housing in new development in areas along High-Capacity Transit lines and areas identified for Transit-Oriented Development

- **Make transit accessible for people with disabilities**

  - **BE3.** By 2019, develop a plan to introduce more low-floor vehicles with ADA accommodations for all people with disabilities and ensure the website and mobile app reflect best practices for ADA accommodations
  
  - **BE4.** By 2019, create an action plan to improve paratransit service
  
  - **BE5.** By 2022, in accordance with legal agreements, provide at least one fully-accessible streetcar on the St. Charles Streetcar Line
  
  - **BE6.** By 2022, in accordance with legal agreements, work with the City of New Orleans to inspect transit stops and develop a new ADA Transition Plan
  
  - **BE7.** In accordance with legal agreements, work with the City of New Orleans to ensure that all transit stops are ADA-compliant by 2031
Measures and Targets

1. Percentage of jobs in Orleans and Jefferson parishes that the average low-income household within RTA’s service area can reach within 60 minutes by transit during peak period.
   » Target: 65% by 2027

2. Percentage of routes with a customer satisfaction rate of Good or better.
   » Target: 100% by 2022

3. Average customer satisfaction rate for paratransit service.
   » Target: Good or better by 2022
## PRIORITIZE THE RIDER EXPERIENCE

**Provide mobility services that are safe, easy to use, and comfortable**

### Strategy: Provide easy payment options

</tbody>
</table>

**Measures and Targets**

1. Average customer satisfaction rate for each mode.
   - **Target:** Good or better by 2022
2. Average customer satisfaction rate for safety.
   - **Target:** Good or better by 2022
3. Rate of safety incidents per 100,000 revenue miles for each fixed route mode.
   - **Target:** Below the national average by 2027
4. Percentage of transit stops with 15 or more daily boardings (n=700) that have benches or shelters, unless prohibited by installation requirements.
   - **Target:** 90% by 2027
5. Percentage of transit stops with 250 or more daily boardings (n=50) that have real-time information, wayfinding, and art/cultural references.
   - **Target:** 90% by 2027
6. Percentage of missing transit stop signs that are replaced within 24 hours of notification to RTA.
   - **Target:** 90% by 2019
7. The average dwell time at stops for each fixed route
   - **Target:** TBD
8. The average time spent boarding at stops for each fixed route
   - **Target:** TBD
## STRATEGY:
Provide real-time information

<table>
<thead>
<tr>

<tr>
<td><strong>BR6.</strong> By 2020, implement paratransit tracking for riders in addition to traditional communication</td>
<td>2018-2022</td>
</tr>
<tr>
<td><strong>BR7.</strong> By 2022, provide real-time arrival info at stops with more than 250 boardings a day</td>
<td>2018-2022</td>
</tr>
</tbody>
</table>
## THE PLAN

### STRATEGY: Add transit priority treatments on roadways and reduce conflicts with automobiles

<table>
<thead>
<tr>
<th>ACTION ITEM</th>
<th>PHASE</th>
</tr>
</thead>
<tbody>
<tr>
<td>BR8. By 2019, begin working with local governments to make bus stops highly visible in order to minimize illegal parking</td>
<td>2018-2022</td>
</tr>
<tr>
<td>BR9. By 2020, study and identify potential solutions to reduce the delay from automobiles turning in front of transit vehicles in neutral grounds</td>
<td>2018-2022</td>
</tr>
<tr>
<td>BR10. By 2020, identify stops to move from near-side locations (before an intersection) to far-side locations (after an intersection)</td>
<td>2018-2022</td>
</tr>
<tr>
<td>BR11. By 2021, begin working with the City of New Orleans to reduce the number of turning conflicts between automobiles and transit vehicles in neutral grounds</td>
<td>2018-2022</td>
</tr>
<tr>
<td>BR12. By 2022, identify potential dedicated lanes, High-Occupancy Vehicle (HOV) lanes, signal priority improvements, queue jumps, and other priority treatments for transit routes to minimize delay from areas with high congestion</td>
<td>2018-2022</td>
</tr>
<tr>
<td>BR13. By 2022, coordinate with local governments to create policies in which roadway maintenance and construction projects include relocation of stops and bus pads to far-side locations, in accordance with Complete Streets policies</td>
<td>2018-2022</td>
</tr>
<tr>
<td>BR14. By 2022, pilot transit priority treatments along one or more transit routes</td>
<td>2018-2022</td>
</tr>
<tr>
<td>BR15. Work with local governments, the Regional Planning Commission, and the State to begin implementing dedicated lanes, High-Occupancy Vehicle (HOV) lanes, signal priority improvements, queue jumps, and other priority treatments for transit routes</td>
<td>2023-2027</td>
</tr>
</tbody>
</table>

### STRATEGY: Retain and recruit good employees

<table>
<thead>
<tr>
<th>ACTION ITEM</th>
<th>PHASE</th>
</tr>
</thead>
<tbody>
<tr>
<td>BR16. By 2022, create a Career Pathways program for employees and ensure competitive pay and benefits</td>
<td>2018-2022</td>
</tr>
<tr>
<td>BR17. Partner with Delgado and other colleges to create apprenticeship programs</td>
<td>2023-2027</td>
</tr>
</tbody>
</table>

### STRATEGY: Increase funding for services

<table>
<thead>
<tr>
<th>ACTION ITEM</th>
<th>PHASE</th>
</tr>
</thead>
<tbody>
<tr>
<td>BR18. By 2020, study traditional and innovative options for increasing funding for services, such as value capture. Include consideration of impacts to low-income households</td>
<td>2018-2022</td>
</tr>
<tr>
<td>BR19. By 2022, increase non-traditional funding sources, including private partnerships</td>
<td>2018-2022</td>
</tr>
<tr>
<td>BR20. By 2022, consider increasing fares</td>
<td>2018-2022</td>
</tr>
<tr>
<td>BR21. Seek additional dedicated funding sources</td>
<td>2023-2027</td>
</tr>
</tbody>
</table>
**THE PLAN**

### ACTION ITEM | PHASE
---|---
**BR22.** By 2018, deploy a marketing campaign to increase GoMobile 2.0 users | 2018-2022
**BR23.** By 2020, deploy Ticket Vending Machines at 25 high traffic stops | 2018-2022
**BR24.** By 2020, as part of Comprehensive Operations Analysis (COA), develop a plan for increasing pre-boarding payments | 2018-2022
**BR25.** By 2022, pilot Ticket Vending Machines and/or other pre-boarding payment options along the entirety of one or more transit routes with chronic boarding-related delay | 2018-2022
**BR26.** Provide pre-boarding payment options for paratransit | 2023-2027

### ACTION ITEM | PHASE
---|---
**BR27.** By 2018, develop a Transit Asset Management Plan | 2018-2022
**BR28.** By 2021, begin overhauling the bus fleet, replacing the majority of aging vehicles and purchasing additional vehicles | 2018-2022
**BR29.** By 2022, as part of a network redesign, adjust routes where schedules are too tight and implement stop-spacing guidelines to reduce redundant stops | 2018-2022
**BR30.** By 2022, create autonomous vehicle pilot | 2018-2022

### Measures and Targets
1. On-time performance for fixed routes*.  
   » Target: 80% by 2020, 85% by 2022
2. On-time performance for paratransit trips.  
   » Target: 90% by 2022
3. Percentage of customers using pre-paid fare media.  
   » Target: 80% by 2022
4. Average overall system speed.  
   » Target: 13 MPH by 2022, 15 MPH by 2027

*Consider headway adherence as the measure of on-time performance for high frequency routes

---

**STRATEGY:** Increase pre-boarding payments

**STRATEGY:** Reduce delays due to excessive stopping, operator fatigue, and vehicle breakdowns
THE PLAN

CONNECT TO OPPORTUNITIES

PROVIDE GOOD ACCESS TO DESTINATIONS
UTILIZING ALL TRANSPORTATION OPTIONS AVAILABLE

<table>
<thead>
<tr>
